Shalom Aged Care 62 Mill Rd 437 6511 R

Going into Residential Care

If you are thinking about moving into residential care, the first step is to have a Needs Assessment. This will ensure all possible options for staying at home are explored before residential care is recommended.

The Needs Assessment and Service Co-ordination service (NASC) should be involved in every entry to residential care, either from your home, public hospital or transfer between facilities. If long term care is required a Needs Assessor will recommend the appropriate level of care for you.

You can phone NASC yourself to arrange a visit to your home:

Bay of Islands, Dargaville,

Kaitia & Whangarei ph 430 4131 or 0800 888 890

Hokianga ph 405 7709

Before moving into residential care, ask for a copy of the admission agreement. This important and often large legal document protects the resident and rest home / hospital by setting out the responsibilities of both. Care Providers are required to provide an Admission Agreement specifying any extra charges.

If you are applying for a Residential Care Subsidy or a Residential Loan, your Needs Assessor will provide the application form and authorise it. You can phone Work & Income on 0800 999 727 with any financial questions.
